

Nowhere else will you meet this caliber of experts in one place!!!

All presentations will allow time to address your concerns and questions.

Live Event — In Person

August 22-23, 2024 ■ Swoope, Virginia

“People routinely ask me who inspires you? I’m ecstatic to assemble the folks who keep me challenged and charged. These are the folks I’d pay to see and hear, and we’ve got them all in one place like one big fellowship. Don’t miss out.” — Joel Salatin

Visit with a select group of vendors ■ Each day enjoy home cooked lunch from the fields of Polyface Farm. Build new relationships with like minded producers. Two full days to soak up information.

The SGF Gathering at Polyface Farms introduces a world-class lineup of mentors August 22-23, 2024.

■ **Darren Doherty**, originator of Regrarians Ltd., is the world’s foremost farm landscape designer. With experience in 50 countries, his eclectic expertise spans Keyline® Design, Carbon Farming and Regenerative Agriculture. His broad hands-on understanding makes him the go-to guru for making your farmscape work for you. In two separate sessions, Darren takes you through fundamental design concepts to make your resource base more efficient, productive, profitable and enjoyable.

■ **Dan Kittredge**, founder of the Bionutrient Association, is the world’s foremost developer in the search for a nutrient meter. His goal is a workable handheld device that measures nutrient frequencies, giving a high/low reading for food in the raw state. The first comprehensive item he’s testing is beef. Nearly 500 analyzed samples show promising benefits of grassfed beef. You’ll learn as much as we know so far.

■ **John Kempf**, founder of Advancing Eco Agriculture, a plant nutrition and biostimulants consulting company, helps farmers by providing education, tools and strategies for soil fertility and plant/animal health. John has a unique ability to simplify complex concepts of soil and plant vibrancy. He offers cutting edge practical procedures to create the healthiest soil to grow the best grass and productive, profitable livestock.

■ **Tai Lopez**, founder of The Knowledge Society and worldwide entrepreneurial guru, will dissect the anatomy of a maverick, which describes all grass farmers. Being a successful maverick is key to being a successful grass farmer. What are the mental and emotional challenges and motivations of a maverick? This presentation offers practical advice to hone your entrepreneurial creativity and love being on the lunatic fringe.

■ **Michael Godfrey**, perhaps America’s foremost ornithologist, produces weekly featherflix videos on the relationships of birds and cattle. His bird identification app is the go-to source for bird watchers nationwide. Grass farms and cattle can be managed to create wildlife and overall ecological synergy. What do grass farmers do well and what do they need to do better? These principles help us all be better stewards.

■ **Kit Pharo** is founder of Pharo Cattle Company, the largest grass-based seedstock producer in America. He brings a wealth of experience in both business and cattle management to the podium and speaks in staccatos of wise soundbites. Operating in several states with more than a hundred landlords, he partners with many farmers and ranchers to bring hardy genetics to the grass movement. His pithy sayings adorn many a barn wall with profound insight and humor; he’s a must see in grass farming.

Whether you’re new or seasoned in grass farming, large or small, these specialists will put you on the cutting edge.

For an extra fee of \$100 ten lucky attendees can attend the speakers’ dinner. Don’t miss this one-time only opportunity.

Joel Salatin
